

Mininet Assignment

Create a custom network topology using mininet python APIs as given below.

No. of hosts: X

No. of switches: Y

- * All the switches should be connected to each other
- * Odd hosts can only talk to each other and even hosts can talk to each other
- * E.g h1 should only be able to ping h3, h5 and h2 should be able to ping h4, h6
- * All the communication should be throttled to 1 mbps for odd hosts and 2 mbps for even hosts

Last date for submission : Thursday, 3 September 2015
